

# AME™ VPRO

## high performance marine barrier coat

For decades, Ashland has served the best boat builders in the world with new technologies that deliver unmatched quality and performance. Our newest product continues the tradition of delivering allure and usability the best by capturing the latest trends and needs for high-performance boats.

Ashland's AME™ VPRO premium barrier coats provide superior performance in critical use environments.

AME™ VPRO barrier coats are specifically designed to help premium boat builders improve the surface quality of their boats while significantly enhancing blister resistance without increasing emissions or compromising flexibility. These products were formulated to be sprayed utilizing standard gelcoat application equipment in order to not disrupt regular production requirements. The use of AME VPRO barrier coats can allow for faster demold times helping to improve manufacturing efficiencies.

### BENEFITS

- Excellent surface profile enhancer
- Exceptional blister resistance
- Maintains laminate flexibility
- Outstanding application properties
- Low Emission

## Innovation and Collaboration to Grow the Marine Market

For the world's top boat builders, Ashland has designed a complete line of premium gelcoats, epoxy vinyl ester resins, unsaturated polyester resins, low profile resins, fuel tank resins, and barrier coats. Combined with Ashland's boat building expertise, product development, and technical service, Ashland will help you become a better, more profitable boat builder.

Ashland's technical service team has an industry-leading reputation for solving problems. We work closely with our customers to understand specific application challenges and recommend the best product to meet business objectives. Whether focused on product design, process optimization or new product development, Ashland prides itself on building partnerships that lead to innovative solutions.
